

## RingGo

RingGo is a popular way of paying for parking in Mole Valley by phone or via the App, without using cash or the parking payment machines in the car parks.

Benefits are:

- Paying for parking without searching for change or queuing for a machine, useful in the case of inclement weather or busy periods
- Ability to extend parking sessions without returning to the vehicle
- Once paid, any RingGo parking session in Mole Valley can be used as a Rover ticket within the town parked in, providing flexibility if drivers wish to move within their purchased session
- VAT receipts can be downloaded from the RingGo website if needed
- Multiple cars can be added to one RingGo account
- Option to receive reminder text messages when parking session is due to expire

How it works:

Registering by phone or the App is simple and once complete, motorists can park in any Mole Valley car park, purchasing their session either by calling 01737 880022 or using the App. On registering, motorists can choose if they would like a reminder text message when the session is due to expire. These reminder texts are charged for and they can be opted out of.

There is a 12p convenience charge for using RingGo, for example if you park for 1 hour you will pay 72p, instead of 60p for 1 hours parking.

As with all our parking tickets, within the same town RingGo parking is transferable, so if you want to move car parks you can.

Many other councils use RingGo, including nearby towns such as Reigate, Guildford and Crawley.

The MVDC webpage has more detailed information about using RingGo - <http://www.mole-valley.gov.uk/index.cfm?articleid=16805>
